H2020 NICE: Nature-based Solutions for the creation of a circular urban water cycle

The NICE project, led by CETIM, will develop, design, and implement different Nature-based Solutions to address issues related to the urban water cycle, thereby enhancing its availability. Our Technological Centre is already engaged in analyzing new absorbent materials and implementing mixed-culture microorganisms in actual wetlands to degrade emerging pollutants present in the urban water cycle, aiming to achieve the project's objectives.

Events

Raw Materials Week
15-17 November 2023
Brussels

13-17 November 2023 - Brussels | CETIM will participate in the 'Raw Materials Week', the annual event organised by the European Commission that brings together leading experts to discuss policies and initiatives in the field of raw materials. It will be an excellent opportunity to debate on policies and initiatives in the field of raw materials and from CETIM we will offer our vision and experience of the research that we carry out in relation to this topic, such as H2020 BIORECOVER.

20-24 November - Brussels | A new edition of the 'European Hydrogen Week' is coming and CETIM will be part of it. The event, organised by the European Commission and Clean Hydrogen Partnership, will bring together the entire hydrogen sector in one place, Brussels Expo. All attendees will have the opportunity to attend conferences, exhibitions and great networking opportunities to deepen their understanding of hydrogen and learn about the trends, challenges and opportunities of the hydrogen industry.
